

Performance Testing Phase

Date	26 June 2025
Team ID	LTVIP2025TMID31434
Project Name	CRM Application for Jewel Management - (Developer)

Dashboard-1:

Performance Observations (Phase Testing) for Dashboard-1:

1. Accurate Data Visualization

All three charts (donut, bar, funnel) rendered correctly with real-time values. Billing records (10 total) and price segments accurately reflect entries in the system. Silver and Gold items are correctly categorized, each with 5 entries in the bar chart.

2. Functional Report Integration

"View Report" links under each chart are working and redirect to detailed Salesforce reports, confirming backend connectivity and report mapping is functional.

3. Pricing Tier Segmentation is Clear

Funnel chart shows diverse price bands for Gold and Silver items (e.g., ₹5k to ₹76k). Total Silver pricing is correctly summed up as ₹132k, indicating correct aggregation logic.

4. UI Load Stability

All dashboard components load without errors or latency during testing. Visuals are responsive and easy to interpret for both technical and non-technical users.

5. Equal Distribution Verification

Bar chart confirms equal distribution of Gold and Silver billings (5 each), helpful for verifying consistency during sales testing.

6. Test Pass Indicators

No missing data points, broken charts, or incorrect values observed during this testing phase.

Dashboard ready for stakeholder review or user acceptance testing (UAT).
objectives for the Jewelry Inventory System project using Salesforce CRM for Dashboard-1:

1. Improve Inventory and Billing Accuracy:

Streamline the tracking of jewelry items, their pricing, and associated billing records to ensure real-time visibility and eliminate manual errors in stock and transaction management.

2. Enhance Customer Order Management:

Establish a seamless linkage between jewelry items and customer orders (Gold/Silver types),enabling faster processing, better customer service, and accurate historical records.

3. Enable Data-Driven Business Decisions:

Provide actionable insights through dynamic dashboards and reports that visualize billing trends, item-wise distribution, and pricing tiers—helping management make strategic inventory and pricing decisions.

Dashboard-2:

Performance Observations from Dashboard-2:

1. New Item with Billings Report:

10 items are billed, with amounts ranging from \$0.00 to a high of \$9,287,875.33. This wide range indicates possible inconsistencies or the presence of high-value custom items. One item is showing \$0.00, which may point to a data error or a complimentary item.

2. Billings by Item Type (Gold vs. Silver):

Both Gold and Silver have 5 records each, indicating a balanced dataset. Good performance in terms of item-type categorization and data uniformity.

3. New Prices Report:

Prices for items like Price-03 and Price-05 are significantly high, exceeding \$50k and \$37k respectively. A few items (e.g., Price-06) are missing price data, which needs attention during testing

Project Objectives for Jewelry Inventory Management Dashboard -2(Phase Testing):

1. Track New Items with Billing Details:

Objective is to visualize how new jewelry items are associated with billing values. Enables monitoring of item value distribution, including extremely high and zero-value billings.

2. Analyze Customer Orders by Item Type:

Understand customer billing patterns for gold and silver items. Understand customer billing patterns for gold and silver items.

3. Monitor and Update Jewelry Prices:

View and compare the current silver prices for various jewelry products. Supports pricing strategy alignment with market rates.
